

Lumi's AI Around Us Scavenger Hunt

Can you spot
smart technology
in everyday life?

AI can help people recognize patterns, make suggestions, answer questions, and create things. Look around your home, school, or neighborhood for places where AI might be helping.

Can you find something that...

- ☐  Suggests a song, video, or show
- ☐  Helps someone find a place or get directions
- ☐  Recognizes a face, voice, or picture
- ☐  Helps a grown-up shop online
- ☐  Gives helpful answers to questions
- ☐  Helps make a game, drawing, or story more fun

Draw or write one
example you found:

Lumi's Big Questions

Which example was
the most surprising?

How could AI help
people in a kind and
safe way?

What helpful AI
invention would
you create?

Created by Lumi, the Learning Robot

Screen-free AI learning for curious kids ages 6–10
